# SKOPE®

## OPEN DECK SERIES

These innovative open deck chillers have been designed to fit in locations to target impulse shoppers. The larger OD1100 chiller gives you the versatility to easily swap out your existing glass door chiller, while the smaller OD400 chiller has been designed for the end of gondolas or checkouts.

### Excellent Energy Efficiency

- Uses 30% less energy than other leading brands
- One of the most energy efficient chillers on the market today with a 'high efficiency' rating according to Australian and New Zealand standards for energy efficiency, MEPS
- Smart defrost to ensure maximum operational efficiency and reduced power consumption
- When drawn, the night blind ensures that the cabinet light is automatically switched off

### Easy Maintenance and Service

- The SKOPE patented, maintenance-free condenser prevents blockage and overheating of the refrigeration system, significantly improving the chiller's lifespan, reliability and reducing your operating costs (condenser blockage is by far the main contributor to excessive power consumption and refrigeration burn out)
- Cabinet drain captures any spillage, making it easy to clean
- High capacity rust proof condensate tray prevents any water leakage
- Alarm warns owners before the refrigeration temperature gets too high, even in adverse conditions
- Removable front access refrigeration cassette makes servicing a breeze
- Backed by a two-year parts and labour warranty
